

Stain Removal Guide

Cleaning Tips

- **Do not rub carpet surface** as this will spread stain and distort the carpet.
- **When cleaning liquid spills** gently blot thoroughly with clean, white paper towels.
- **Do not press hard** allow liquid to absorb into the paper towels.
- **For solids**, scoop up with spoon working from outside of spill toward centre.
- **Always blot or clean towards the centre** so as not to spread stain.
- **Use cleaning products** according to each labels instructions.
- **Always test** on an inconspicuous area of carpet or upholstery for colour fastness before cleaning.

For these stains **USE SPOT REMOVER**

Blood	Butter/Margarine	Chocolate
Cough Syrup	Crayon	Dirt/Mud/Clay/Grass
Faeces (Non urine)	Food	Grease
Gravy	Ice Cream	Ink
Jelly/Jam	Lipstick	Make-up
Milk	Motor Grease/Oil	Salad Dressing
Shoe Polish	Tobacco	Tomato Sauce
Toothpaste	Red Wine	Vegetable Oil

Candle Wax
USE SPOT REMOVER

Scrape off as much wax as possible with a spatula or spoon. If wax is deeply embedded, cover with a white absorbent cloth and apply iron on low setting to cloth. Wax will transfer to cloth. Any remaining residue can be removed using Spot Remover.

Paint (Water Based)
USE SPOT REMOVER

Old or dried spots may need to soak for an hour.

Coffee
Fruit Juice
Tea
White Wine
USE STAIN REMOVER

Tough stains may need more than one treatment.

Urine
USE STAIN REMOVER

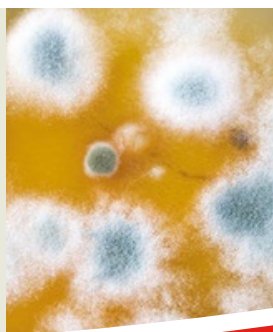

Act quickly! Urine is highly acidic and will bleach some carpets. Once bleaching occurs this cannot be corrected with stain removing products.

Perspiration
or Vomit
USE STAIN & ODOUR REMOVER

Eliminate smell by spraying Odour Remover onto the stain.

Mildew
USE ODOUR REMOVER

Odour Remover destroys the mildew source. After treatment blot well and keep area dry. A follow-up cleaning should eliminate the stain.
